## **Yokohama Rubber to supply tires for 64th Macau Grand Prix**

Tokyo—The Yokohama Rubber Co., Ltd., announced today that will supply “ADVAN” racing tires to the 64th Macau Grand Prix, to be held in Macau (China) November 16–19. Yokohama Rubber supplied tires for this event for 33 straight years until 2015. This year marks the 34th time the Company will support the Macau Grand Prix. YOKOHAMA tires will be the control tire for the event’s main race, the FIA F3 World Cup, and for the FIA World Touring Car Championship (WTCC) race. In addition, they will be the tire of choice for many cars competing in the event’s support races.

The Macau Grand Prix, run on public roads in the city center, is one of the world’s most famous road races. Last year, the main F3 Grand Prix race was designated an official FIA world championship race and renamed the FIA F3 World Cup. YOKOHAMA began supplying control tires for the race in 1983, when Formula 3 vehicles meeting international standards began competing in the event. Because the race is held on public roadways, participating vehicles require tires that provide high performance on surfaces and conditions typical of normal driving conditions, which are quite different from those found on circuit racetracks. The F3 race has been won by many F1 racing greats, including Michael Schumacher in 1990 and Takuma Sato in 2001.
