Yokohama Rubber's GEOLANDAR X-CV tires coming factory-equipped on all-new Nissan Patrol

Hiratsuka, Japan—The Yokohama Rubber Co., Ltd., announced today that it is supplying its GEOLANDAR X-CV tires as original equipment (OE) to all-new Nissan Patrol, large SUVs, which were launched in the Middle East in November 2024. Patrol is being fitted with 275/60R20 115H size tires.

The GEOLANDAR X-CV tires being supplied as OE on the Patrol represent a new standard in highway terrain tires focused on high-speed performance and maneuverability. Specially tuned structure and tread patterns deliver excellent driving stability and reduced weight, with improved snow performance and quietness.

The seventh generation of Patrol features a bold design, powerful V6 twin-turbo engine, and premium interiors to deliver a superior driving experience.

Under Yokohama Rubber's three-year (2024–2026) medium-term management plan, Yokohama Transformation 2026 (YX2026), the consumer tire business aims to maximize the sales ratios of high-value-added tires. One of the key initiatives under this strategy is promoting the global flagship ADVAN brand tires and the GEOLANDAR brand tires for SUVs and pickup trucks as original equipment for new cars.
